Calyx Ware FINE "LOWESTOFT" REPRODUCTION

Typical of the lovely Oriental patterns imported from China in the 1760-1790 period — the early days of the Tea Trade. The green-blue porcelain glaze (which sometimes runs unevenly over the ware as in the originals), the hand enamelled design, combine with the interesting shapes to give a delightful effect on your table. Made in England by William Adams — potters since 1657.

Old Guilford Forge

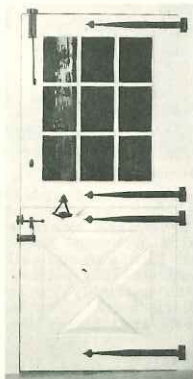

HAND-FORGED AUTHENTIC REPRODUCTION
HARDWARE

"Finds" for Restoring Early Houses!

Mellow Charm for New Homes!

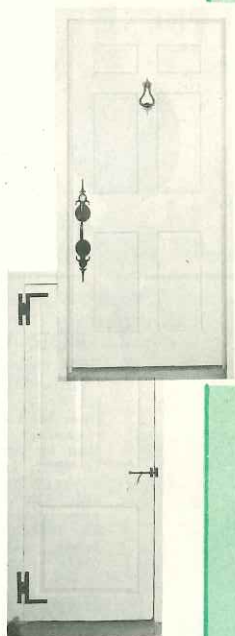

The early blacksmiths of Guilford and surrounding towns produced some of the colonies' finest hand forged hardware and an amazing amount of it is still in use on the many 17th and 18th century homes in this area.

Our craftsmen have faithfully copied many of these outstanding pieces, fashioned them by hand to preserve all their rare charm and sturdiness. Through careful hand finishing these reproductions become truly authentic, not only in design, but in finish. They have the appearance and "feel" of the originals.

At right is a view of the Hardware Room in our Retail Shop. Above are full-sized doors installed in the room which show much of our hardware in actual use.

Our hardware is fully described on the following pages. For your convenience, we will be glad to wrap and label the hardware for each of your doors separately — just send us your instructions.

EARLY HAND WROUGHT

The NANTUCKET Latches

Two massive outside door latches which are truly "conversation pieces." Each is an authentic reproduction of a latch found on one of Connecticut's outstanding pre-Revolutionary homes. So constructed that a regular lock set can be installed in it, if you so desire, without detracting from its appearance. Sturdily hand wrought, black finish. Parkerized (rust-resistant). Matching screws furnished. Wt. 3 lbs. (Please specify design.)

#301 SWORDFISH design—3¾" wide, 24" long.

#302 HEART design—3½" wide, 19" long.

Back Latch Assembly

Latch bar, guide and strike regularly furnished with Nantucket latches

in Group I. At right: Side view of strike showing hand wrought brace.

MATCHING CYLINDER LOCKS

For those who wish a modern lock to use with front door latches

FOR USE WITH GROUP II

FOR USE WITH GROUP I

Standard Front Door Lock

#6761 — The standard Sargent mortise front door lock and night latch for use with Group II — cannot be used with back latch assembly. Can be set with button in face so, when door is shut, latch can't be operated from outside without key. Dead bolt operates with key outside, turn knob inside. Latch bolt always operates from door knob inside. Door knob required on inside. Black knob described below. (If brass knob is desired, purchase locally.) Complete with turn knob, keys. Black finish. Wt. 4 lbs. \$17.50

Inside Door Knob

#1772 — For use with #6761 lock only. Black finish. 2" diameter. Complete with matching escutcheon and spindle. Wt. 1 lb. \$2.95

#4821—May be used with Group I. This lock has dead bolt only and MUST be worked either with key on outside or turn knob inside. Does not lock automatically when door shuts. It does permit regular back latch assembly on inside of door. Black finish. Complete with turn knob and keys. Wt. 3 lbs \$12.50

BEFORE ORDERING LATCHES — PLEASE READ

To visualize how your door hardware will look, place yourself in front of a door. If the door opens AWAY from you, the grip design and thumb piece will be on your side of the door. The HL or H hinges and the back latch assembly (bar, guide and strike) will be on the other side of the door. If the door opens TOWARDS you, the back latch assembly and hinges will be on your side of the door and the grip and thumb pad on the other side. It cannot be otherwise because the drop or latch bar in the regular assembly extends beyond the door to engage the strike on the door casing, so the door can only swing out from this side.

On closet or cellar stair doors, which open toward you, or where the decorative effect of the grip would be lost on the inside, you may use a Closet Type Back Latch (described on opposite page) which allows the grip to be located on the side of the door that opens toward you along with the hinges.

DOORS MUST HAVE PLAIN TRIM --- MOUNTED FLUSH! Be sure your architect or builder understands this or they will have trouble mounting latches or hinges.

HT THUMB LATCHES

The SUFFOLK Latches

FOR OUTDOOR OR INDOOR USE

Sturdy, hand wrought latches in traditional old designs copied from prized 18th century originals. Parkerized to prevent rust. Large latches are available with or without back latch assembly* — small latches complete with latch assembly. Wt. 2 lbs.

REGULAR BACK LATCH ASSEMBLY

Furnished with all above latches in Group I

Consists of latch bar, guide and flush or mortise strike. Strike (b) is a mortise strike to be used for offset door jams. Assembly regularly furnished with Group I latches at no extra cost.

Regular Assembly if purchased separately (Wt. 1 lb.) \$3.95

CLOSET-TYPE BACK LATCH ASSEMBLY

For doors where grip is on side of door which opens toward you. Has special offset latch bar and reverse bevel strike which is mortised into the door stop allowing the latch bar, when lifted, to come through the casing when the door is pulled toward you.

If ordered with latch, replacing regular assembly, no extra cost.

If purchased separately (Wt. 1 lb.) \$3.95

AREFULLY

* Nantucket and Suffolk Latches are available in the following 2 types of installation. Check carefully for the type that meets your needs.

GROUP I

Complete with back latch assembly (latch bar, guide and strike). Long thumb piece. Can be used alone or with #4821 Cylinder Lock described on opposite page.

GROUP II

Design, grip, and short thumb piece only. No back latch assembly. To be used with #6761 Front Door Lock described on opposite page. Door knob required on inside of door.

CYLINDER LOCK COLLARS

To Match Any Latch Above

These hand wrought collars fit standard type cylinders. They can be used with either lock described on opposite page. Collar number is same as latch number with "C" added (as 61C etc.) Wt. 1/2 lb. \$1.95

NORFOLK LATCH

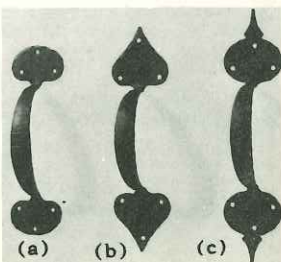

For Inside Use Only

This type of latch appeared in the late 18th century and was common until about 1840. Cast handle and hand wrought back. The same back latch assembly is furnished as for the other latches. 7 1/2" long. Wt. 2 lbs. \$9.50

Hand Wrought DOOR PULLS

310 — Handsome pulls available in 3 authentic designs to match latches. Choose Bean (a) Heart (b) or Swordfish (c) patterns. Wt. 1 lb. \$4.95

EARLY AMERICAN STRAP HINGES

In the early days virtually all outside doors — and some larger inside doors swung on sturdy strap hinges. These hand wrought reproductions are perfect for fence gates, barn or garage doors, "primitive" rooms. Parkerized (rust-resistant) black finish with matching screws. Available complete with pintles or as hinge plates alone.

Lighting in the Spirit of '76

Authentic Reproductions To Use with Candles or Electricity

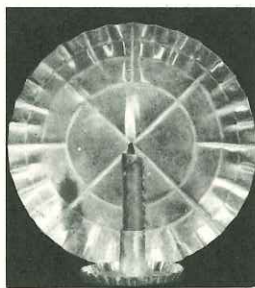

Through Charles F. Montgomery, one of the foremost authorities on early lighting, we obtained the fine chandelier and sconces shown here. We have reproduced them exactly as you would have purchased them 200 years ago — in bright shining tin to give maximum reflection. Today the originals are dulled with age — but we believe true connoisseurs will prefer them in their bright finish.

ELECTRIFIED FIXTURES have candelabra base sockets, hand molded in candle wax to give the truest possible effect of real candles. "Nalco" Candleflame bulbs give a fine semblance of candlelight with these fixtures.

HOW TO ORDER AND COMPUTE POSTAGE

TO MAKE OUT YOUR ORDER:

Please use our order blank if available.

In any event, **PRINT YOUR NAME & ADDRESS PLAINLY.**

List each item separately, showing:

Quantity desired, Catalog number, Description of item, Total price, Shipping weight on items to be sent by parcel post.

Add total cost of merchandise.

Add shipping weights on parcel post items. Determine your approximate zone from map below, then determine postal charges from chart at right.

Add postal charges to merchandise cost, and enclose check or money order for total amount, made payable to Old Guilford Forge, Inc.

If you wish order sent to an address other than your own, please specify **PLAINLY**. If this is a gift, please enclose gift card.

FOR FASTER DELIVERY

If you are in a hurry for your order and are afraid parcel post may be too slow, for a few cents more, you can specify **SPECIAL HANDLING** (a Postal service). **SPECIAL HANDLING** means your package is handled as fast as first class mail between post offices. After it arrives in your city, it gets regular delivery — but between towns this service often saves several days.

Special Handling Rates: Up to 2 lbs. — 25¢
2 lbs. to 10 lbs. — 35¢
Over 10 lbs. — 50¢

Figure regular parcel post charges, add proper amount shown here and specify **SPECIAL HANDLING**

IMPORTANT NOTICE

Parcel Post regulations restrict the size of packages and the weight allowed to 20 lbs. between first class post offices. If your order comes to more than 20 lbs., figure it as two or more packages. Single items weighing more than 20 lbs., or that are too bulky for parcel post, must go Express Collect, and are usually so marked in the catalog. Where necessary, we will make two packages if we can, or we will ship Express Collect and refund the money sent for postage. If you live on a rural route, your packages can weigh up to 70 lbs.

RETURNS

If you have occasion to return anything to us, be sure to write a letter explaining fully the reason for the return, attach a 4c stamp to the envelope and affix the letter to the *outside* of the package. This will assure that your shipment receives prompt attention.
